Required Text  
Introduction to Information Systems, 12th Edition  
James A. O'Brien

Course Description  
The role of information technology in organization. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

Students needing special learning accommodations should make them known to the instructor as soon as possible.

Course Requirements  
Exams (3) - 30 points each  
Quizzes (weekly) - 10 points total  
Total =100 points

Exam  
There will be three exams for the course. Students will be provided with study materials to help prepare for the exams.
