Our Software R&D Department is currently searching for new team members to fill the positions of Junior Software Engineers. The ideal candidates will possess strong technical skills in software engineering (knowledge of C++ and 3D graphics a plus), strong communication skills and ability to support other groups and activities (customer demonstrations, installations, on-site development, etc.) and above all have a very positive can do attitude. This is a great opportunity to be part of a team that enjoys diversity in a work environment, fast paced challenges and having Fun at work.

Key Requirements

Attitude is everything!

- You must be a team player, self-starter, dependable and have the ability to work in a fast-paced environment.
- You need to be a flexible, professional person, who is not afraid to work hard.
- Must have excellent time management and organizational skills.
- Professional, independent thinker who can take initiative.
- US citizenship required.

Responsibilities

Primary responsibilities include and are not limited to the following:

- Design, implement, document and test software modules, prototypes and applications
- Participate in software project and product meetings including design reviews
- Participate in development of proposal documentation
- Participate in software support in-house or on-site, on an as-needed basis
- Participate in project scheduling and estimation
- Travel as needed
- Set-up customer presentations and demonstrations.
- Assist the sales group with technical expertise when needed.
- Maintain technical competence through periodic review of current papers related to software development techniques, 3D computer graphics, etc.
- Other tasks as directed by Software R&D Manager

Experience

- Beginners will be considered, up to 2 years experience in commercial software preferred
- Bachelor of Science in Computer Science [or equivalent with software experience and references]
- Experience developing interactive applications: GUIs, 2D or 3D Graphics, video
- Ability to work on multiple projects simultaneously
- Strong visual, oral and written communication skills are required

Location

Marshalltown, Iowa, with potential extended travel in North America.

Fakespace offers an exciting work environment, competitive salaries and a generous benefits package, including performance incentives and profit sharing.

If you meet the above requirements and are ready to join a company that is experiencing phenomenal growth, we encourage you to send in your resume along with your salary requirements today. Our selection process will include a credit and background check, as well as personality and aptitude, pre-employment, and drug testing to help ensure the proper candidate is added to the team. While a security clearance is currently not a requirement, you must be capable of receiving a security clearance to the secret level.

Applicants should submit their resume to jobs@fakespace.com; or fax to Human Resources Department at 641-754-4650.
